

Research Group "B Lymphocyte Development" (Prof. Dr. Hermann Eibel)

Hermann Eibel Group Leader, Head of Clinical Research Unit for Rheumatology

Education: 1974 - 1979 Diploma in Biology II, Biocenter, University of Basel, Switzerland

1979 - 1982 Ph.D. Thesis Student, Biocenter, University of Basel, Switzerland

Postdoctoral Training and Positions: 1983 - 1985 Postdoctoral Research Fellow, Albert-Ludwigs-University Freiburg, Institute for Biology

1985 - 1992 Group Leader Max-Planck-Institute for Immunobiology, Freiburg, Department of Prof. Georges Köhler (PhD)

1992 - present Head of Clinical Research Unit for Rheumatology University Medical Center Freiburg, Dept. of Rheumatology and Clinical Immunology

2000 Habilitation in Molecular Immunology at the Faculty of Biology, Albert-Ludwigs-University Freiburg

Our group focuses on the development of human B cells and primary immune defects affecting B lymphocytes. Together with Klaus Warnatz and Uli Salzer we found that homozygous deletion of the BAFF-receptor gene may cause common variable immunodeficiency.
