

Research Group "Molecular genetics of antibody deficiencies" (Dr. Ulrich Salzer)

Ulrich Salzer Group Leader

1993-01 Study of Medicine University of Regensburg and TU Munich

1997-99 Graduate school of the DFG 333 "Biology of human diseases"

2001 Final University examination in Medicine (Staatsexamen)

2001-02 Post-Doc, Institute of Medical Virology, University of Zurich, Switzerland

2002 MD Thesis, Technical University Munich

2003 License to practice medicine (Approbation)

2002-08 Postdoctoral Researcher at the department of Rheumatology and clinical Immunology, University Hospital of Freiburg

since 2009 Research group leader

Our research focuses on the molecular genetics of primary immunodeficiency. Using linkage analysis and targeting selected genes we have been successful in identifying genes responsible for the most common primary immunodeficiency, common variable immunodeficiency - CVID.
