

"Molecular Biology of Viruses"

Wednesday 17:15 - 18:30

Seminar Room Institute for Med. Mikrobiologie & Hygiene, Hermann-Herder-Str. 11,
79104 Freiburg

Program SS 2012

April 18 (at 17:15) Registration and assignment of papers to students

1. Role of T cells for immunity against heterotypic influenza viruses

April 25 Introduction: **Georg Kochs**

May 2 Discussion of relevant literature by students

2. Virus ecology

May 9 Introduction: **Dennis Rubbenstroth / Tanel Mahlakoi**

May 16 Discussion of relevant literature by students

3. Functional non-coding RNA

May 23 Introduction: **Linda Brunotte**

June 6 Discussion of relevant literature by students

4. Giant viruses

June 13 Introduction: **Martin Schwemmle**

June 20 Discussion of relevant literature by students

5. Vectored immunoprophylaxis against difficult viral targets such as HIV

June 27 Introduction: **Mindaugas Juozapaitis / Otto Haller**

July 04 Discussion of relevant literature by students

6. Commensal bacteria and viruses

July 11 Introduction: **Peter Stäheli**

July 18 Discussion of relevant literature by students

Course organized by: Prof. Dr. Peter Stäheli (Tel. 6579)
