

## German Clinical Trials Register (DRKS)

The German Clinical Trials Register (German CTR) is currently being developed at the Department of Medical Biometry and Statistics of the University Medical Center Freiburg as a joint project of the Clinical Trials Unit and the German Cochrane Center. It will be an open access online register of all clinical trials conducted in Germany, which will allow all users to register trials and search for or share information on clinical trials.

The German CTR is designed to comply with the requirements of the International Committee of Medical Journal Editors (ICMJE) and developed in close collaboration with the WHO's International Clinical Trials Registry Platform (ICTRP)

Please find the register by using the following link:
