

AI for Researchers: Unlocking New Potentials and Avoiding Pitfalls

Are you a researcher feeling like you're lost at sea when it comes to AI? Like you're on a boat without a map, with waves of new tools and opinions crashing all around you? What should you use it for? What should you avoid?

With so many strong opinions out there, it can feel impossible to find solid, reliable information. And of all the hundreds of AI tools out there, which should you use and how? If you're wondering about these sorts of questions, Animate Your Science has the workshop for you. Unlock the power of AI to supercharge your productivity and get one hour per day back.

This workshop will be your compass, equipping you with the knowledge and tools to harness generative AI responsibly. Learn to differentiate between ethical and unethical AI applications, streamline writing tasks, and create visually striking images. With a special focus on using AI to prepare better grant applications faster, you'll master prompting techniques to boost the quality of AI-generated content, saving you valuable time. Don't miss this opportunity to get ahead in your research journey. The AI revolution is moving fast, and you don't want to be left behind. Start making every minute count towards a greater impact today!

The Transformation

Transition from apprehension over AI's risks to assurance in discerning ethical from unethical uses.

Go from feeling lost in AI's legal maze to confidently navigating it.

Shift from settling for subpar AI outputs to mastering the art of prompting for high quality texts and graphics.

Move from squandering precious time on mundane tasks to reclaiming an hour daily by leveraging AI's efficiencies.

Key benefits

1. Understand AI's legal and ethical frameworks confidently.
2. Master AI prompting for superior outputs.
3. Save an hour daily by using AI tools.
4. Boost your research's reach and impact with AI.

Materials

Participants will need a computer, internet access, and their preferred method of notetaking.

Programme (tentative)

AI for Researchers: 4-Hour Workshop Programme

9:00-9:15 | Welcome & Introduction

9:15-10:00 | Risks + Ethical & Legal Framework

10:00-10:45 | Effective Prompting Techniques

10:45-11:15 | Break

11:15-11:45 | AI tools for research

11:45-12:30 | AI for grant writing

12:30-13:00 | Guided Practice & Q&A

Presenter

Dr Tullio Rossi is an award-winning science communicator, marine biologist, and graphic designer. As the **Founder of the science communication agency "Animate Your Science,"** he helps researchers tell their story to the world. He has had the privilege of **training over 4,000 researchers from 45 countries** in the art of effective science communication since 2017. The guidance he provides in his trainings is **based on years of real-world experience**, using the same techniques applied daily in client work.

More recently, Dr Rossi went deep into the AI rabbit hole, exploring the complexities of AI and the legal landscape around it. Now, he is in a position to help researchers catch up, so they don't get left behind in the fast-moving AI revolution. **He is eager to share what he has learned about using AI to boost productivity and amplify the impact of research.**

Kind regards,

Dr. Tullio Rossi

Director @ Animate Your Science
