

3rd European Novalis® Radiosurgery Symposium November 4, 2011

Brainlab and Varian Medical Systems cordially invite you to “meet the experts” in Stereotactic Radiosurgery and Radiotherapy at the Third European Novalis® Symposium.

The event will be hosted by Prof. Dr. Anca-L. Grosu, Medical Director of the Department of Radiation Oncology at the University Medical Center Freiburg, Germany, where the first European TrueBeam STx™ with Novalis® Radiosurgery was acquired. Famous radiosurgery and stereotactic radiotherapy experts will share their clinical experience with the Novalis Radiosurgery Program.

Since its implementation in 1997, the Novalis Radiosurgery clinical community has grown to more than 230 centers worldwide and the TrueBeam STx™ with Novalis® Radiosurgery is the latest platform to join the Novalis® family.

Attendees should expect a lively and open discussion driven by highly experienced Novalis® clinicians on advanced treatments covering both brain and body stereotactic fractionated radiotherapy and radiosurgery.

We look forward to welcoming you in Freiburg!

Sincerely,

A handwritten signature in black ink, appearing to read "Grosu", with a stylized flourish at the end.

Anca L. Grosu, MD, Professor
University Medical Center
Freiburg, Germany

A handwritten signature in blue ink, appearing to read "Carsten Sommerfeldt", with a stylized flourish at the end.

3rd European Novalis® Radiosurgery Symposium November 4, 2011

Venue

Clarion Hotel Hirschen
Freiburg im Schwarzwald
Breisgauer Straße 47
79110 Freiburg, Germany
Tel: +49 761 89 77 690
Fax: +49 761 87 994

Agenda

9:00 Registration and Coffee

9:15 Welcome, Prof. Dr. Anca-L. Grosu, Freiburg

9:20 Novalis Radiosurgery Product Overview

9:40 TrueBeam STx™ with Novalis® Radiosurgery: future treatment strategies, Prof. Dr. Anca L. Grosu, Freiburg in Breisgau

Cranial

10:00 Challenges and hopes for combining surgery and radiosurgery for cranial indications, Mr. James Leggate, Manchester

10:20 Radiosurgery for metastases and the status of whole brain radiotherapy, Mr. Michael Jenkinson, Liverpool

10:40 Single and hypo-fractionated radiosurgery for acoustic neuromas and AVMs, Dr. Otto Meijer, Amsterdam

11:00 Discussion

11:20 Coffee Break

Extra-cranial

11:40 Tackling the challenges of head and neck treatments, Dr. Jean-François Daisne, Namur

12:00 Adaptive gating for stereotactic lung radiosurgery, Dr. Carmen Rubio, Madrid

12:20 Secrets of success for stereotactic liver radiosurgery, Dr. Reinhard Wurm, Frankfurt Oder

12:40 Evaluation of hypofractionated prostate radiosurgery, Prof. Raymond Miralbell, Geneva

13:00 Discussion

13:20 Lunch

14:30 Facility tour of the University Medical Center Freiburg, Department of Radiation Oncology (small groups)

16:00 Final remarks

Registration

Registration is free of charge however space is limited.
