

Mission Statement of the Comprehensive Cancer Center Freiburg – CCCF

Comprehensive Cancer Center Freiburg-CCCF

The Comprehensive Cancer Center Freiburg coordinates the **interdisciplinary treatment** of patients with cancerous diseases at the Medical Center – University of Freiburg.

We want our patients to receive the best possible diagnosis, treatment, and aftercare. We respect individual needs and the dignity of all of our patients. At the same time, we work at the highest level and according to the latest standards of international science.

The therapies offered at the Comprehensive Cancer Center Freiburg – CCCF are conducted in accordance with binding treatment methods. They are agreed upon by doctors from various areas of specialization in joint conferences (**tumor boards**) and are continually refined to reflect the latest scientific findings. The treatment of each and every patient is discussed in a team.

Treatment by our teams of doctors at the Comprehensive Cancer Center is complemented by care from qualified nurses. Our **comprehensive treatment concept** includes psycho-oncology, social counseling, prevention, dietary counseling, naturopathy, sports oncology, pastoral care, home care, and palliative care and therefore considers the patient as a human being with needs and wants.

We can make recent findings from **fundamental research** at the Comprehensive Cancer Center Freiburg directly available to our patients by request in strictly controlled studies.

As a cancer center for the entire South Baden region, we are the main **point of contact** for doctors and hospitals in the region and cooperate with self-help organizations.

We are engaged in training and offer specialists as well as our employees a wide range of high-quality **continuing education and training courses**.
