## PROSTATE CANCER: DIAGNOSIS AND TREATMENT

Dear colleagues, dear patients,

We feel honored to invite you to the 7th Langendorff-Symposium in the charming city of Freiburg!

The aim of the symposium is to present new aspects in the evolving field of treatment in prostate cancer. The focus will be laid on functional and biological imaging, epigenetics and immunology, surgery and robotics, radiation therapy (adaptive radiation therapy, hypofractionation, protons and brachytherapy) and hormone ablative treatment.

Internationally renowned experts will emphasize the multidisciplinary components of our practice and their translation in the daily care of patients.

We would be glad to welcome you in Freiburg, where you can contribute to the success of our symposium!

See you in Freiburg

**Professor Anca-Ligia Grosu**
